## Welcome Spring!

Over the past half term, the Eco Team have focused on nature- in particular, the birds who find a home around our school grounds.

We dedicated a whole project to studying our local birdlife. We looked at the different species, their habitat, their dietary habits and investigated how we could care for them.

## Native Birds

The team have researched the birds that we would expect to find in our local area. Working together, they gathered facts about common species and how best to care for the birds and their habitat..

## Big Garden Birdwatch

The Eco Team were very excited to take part in this years RSPB Big Bird Watch. Armed with clipboards and binoculars, we spent a very peaceful morning in the school grounds, recording the different species we saw. The children were very excited to see such a variety and eager to submit our results to the RSPB.

## Dinner is Served!

The children have worked hard to make some delicious treats for our birds. They cooked up a storm to create bird seed cookies and peanut butter rolls!

The birds enjoyed their special treats!
